RED UNIT

Inspection

Type: ROUTINE INSPECTION

Date: DEC-05-2002

3.127 (d)

FACILITIES, OUTDOOR.

A perimeter fence is required around dangerous animals. It must be at least 8 feet high and 3 feet away from the primary enclosure around dangerous animals. This is a regular winter quarters location prior to the start of the exhibit season, and this applies at winter quarters locations even for traveling facilities. It does not apply during travel. Any fence less than 8 feet for dangerous animals must be approved in writing by the Administrator.

The set up at this location has a 6 foot high chain link fence, within premises that have guarded entrances. There is also additional human security for the fenced compound that augments this.

The licensee needs to increase the height of the fence, or receive approval for a lower height, as outlined in 3.127(d), after submitting a written request for same.

Please correct before the next season's winter quarters period at this location.
